## **DETAILED ACTION**

### ***Specification***

Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

The abstract of the disclosure is objected to because the abstract is too long and utilizes legal phraseology (i.e. "means"). Correction is required. See MPEP § 608.01(b).

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2 are rejected under 35 U.S.C. 102(b) as being anticipated by Schwartz '716. Schwartz discloses a toy system containing all of the elements of the claims

Art Unit: 3714

including, with respect to claim 1, a tub having sides (tub 100) an overflow spout (read onto hose 104 since hose 104 is connected to the tub and will inherently act as an overflow at the point of connection) and a stable boat (boat 10) sized to float in the tub without touching the sides of the tub (figure 3). Weights, as required by claim 2, are shown as elements 15 and further described at col. 2, lines 1-4.

***Allowable Subject Matter***

Claims 3-17 are allowed.
